

RADIO-ENERGIE®

If you are looking for:

Rugged and reliable sensors,
A possibility to realize various combinations,
An evolving system

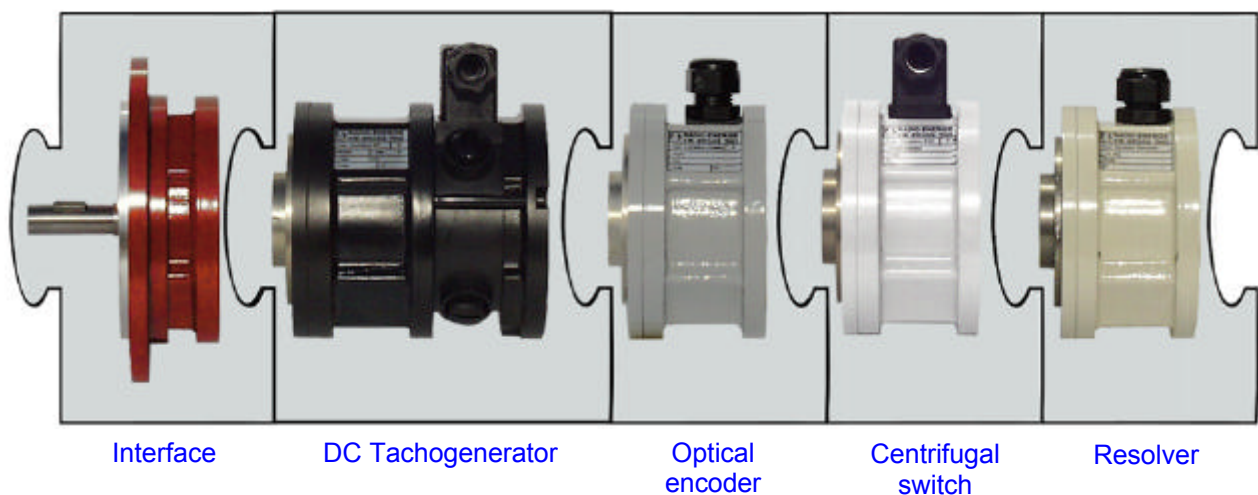

... you will appreciate the «COMBINO Range»

COMBINO is a child's play:

1. You mount the customized interface on the driving machine.
2. You can assemble any type of **COMBINO** sensor one behind the other.
3. **COMBINO** helps you to build up your sensor combination and make it evolve as you wish.

And furthermore :

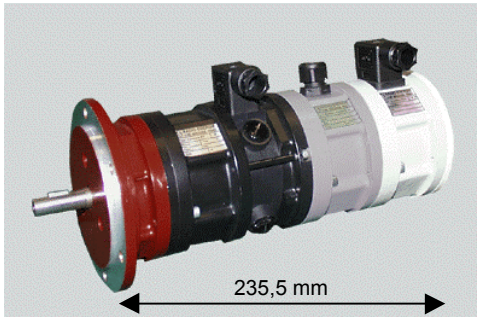

4. The **COMBINO** interface module is equipped with an integrated coupling, the solution for all coupling problems!
5. The combinations are of unparalleled compactness.
6. You build up yourself your combinations : You save time, stocking space and money !
7. If your requirements change, you just exchange a sensor without changing the interface module.

RADIO-ENERGIE®

COMBINO RANGE

DC tachogenerator, optical encoder,
centrifugal switch

DC tachogenerator, optical encoder

Optical encoder, centrifugal switch

DC Tachogenerator, centrifugal switch

- Modular combinations of different speed and position sensors
- Easy and quick assembly
- Very compact combinations :
Space saving : higher than 20 %
- Integrated coupling
- Specific interfaces on customer's request
- Totally interchangeable
- Short delivery time

We reserve the right to modify technical features in the interest of technical progress.
